**HALSCO** Cylindrical Grade 2 Lever Locksets are designed for use in situations where durability is the deciding factor. Our cylindrical lock chassis are all constructed with cast retractors on bronze roller bearings. This strong, durable component gives our cylindrical sets the ability to last millions of cycles. This ANSI Grade 2 cylindrical lever lockset features a lever lock with large, long-lasting lever springs, a standard Halsco latch, and removable through-posts for optional mounting. It is available in 6-pin C keyway and in five basic functions all in a 626 finish. Available in 2-3/4" backset 2-3/8" available.
